DETAILED ACTION

Election/Restriction

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-14, drawn to supramolecular assemblies, classified in class 525, subclass 50.
- II. Claims 15-18, drawn to pharmaceutical formulations comprising a supramolecular assembly and a pharmacological constituent other than a peptide, protein or genetic material, classified in class 514, subclass 1.
- III. Claims 15-18, drawn to pharmaceutical formulations comprising a supramolecular assembly and a pharmacological peptide or protein, classified in class 514, subclass 2.
- IV. Claims 15-18, drawn to pharmaceutical formulations comprising a supramolecular assembly and a pharmacological genetic material, classified in class 514, subclass 44.

Claims 15-18 are generic to a plurality of patentably distinct inventions set forth as groups II-IV. If one of these groups is elected, the claims will be examined to the extent that they are defined by the elected group.

Groups I-IV are distinct because they are structurally and functionally disparate compositions. The composition of group I is not a pharmaceutical formulation and cannot by

itself be used for any pharmacological effect. It could however be used for non-pharmaceutical purposes, such as the delivery of molecules to cells in vitro. The compositions of groups II-IV are pharmaceutical compositions comprising structurally and functionally distinct pharmaceutically active agents. The non-peptide, non-protein, non-genetic material component of group II is clearly structurally and functionally distinct from the peptide, protein, and genetic materials of groups III and IV. The peptides and polypeptides of group III are distinct from the genetic material of group IV because, unlike the genetic material, they cannot encode a gene product of any kind, and therefore must have a different function or mechanism of action than the genetic material.

Because these inventions are distinct for the reasons given above, have acquired a separate status in the art as shown by their different classification and their recognized divergent subject matter, and because each invention requires a separate, non-coextensive search, restriction for examination purposes as indicated is proper.

Applicant is advised that the response to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any

Art Unit: 1635

amendment of inventorship must be accompanied by a petition under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(I).
